

# SECOND BIENNIAL CYBERSECURITY AND DATA PRIVACY CONFERENCE

**MARCH 3-4, 2022**

**GEORGIA STATE UNIVERSITY, ATLANTA GA**

Join us for our second biennial conference! We will cover emerging issues in the cyber insurance landscape, updates on regulator and governmental entity perspectives, and trends impacting high profile sectors like healthcare, construction, education and media. Issues surrounding telehealth, artificial intelligence, misuse of data, and data integrity will also be addressed in addition to ethical considerations for lawyers relating to technology use and data protection. We have enlisted contributors to the upcoming TIPS book, "A Practical Guide to Cyber Insurance for Businesses" as well as attorneys, agents/brokers, insurance underwriters and claims personnel, academics, and cyber response vendors. We look forward to seeing you there!
